Permutation test: best of 18 combinations vs. chance
Maximum mean AUROC over the 18 combinations in each of 199 subject−level label permutations
Main model
0.738, p = 0.190
Best of 18
0.802, p = 0.060

Maximum mean AUROC across the 18 combinations (null distribution)
Null maximum: 0.662 ± 0.083 | one−sided p = (b + 1)/(m + 1)
